

Training Partnership

Capacity Building on Sexual and Reproductive Health: from Preparedness to Recovery

On behalf of the IAWG Training Partnership
Nguyen Toan Tran MD, MSc, DrMed
Humanitarian Response Branch
UNFPA - Geneva

Briefing for Permanent Missions
16 October 2009

Objectives of 4th IAWG TP Meeting

1. To provide an update on training initiatives on SRH in humanitarian settings carried out by IAWG partners.
2. To discuss quality control of training materials and certification of trainees.
3. To discuss pilot models for the roll out of IAWG curricula by training partners
4. To brainstorm on a platform for sharing information on curricula updates, training events, roster of trainers and trainees, etc.
5. To explore funding strategies for the sustainable implementation of trainings.

Guiding Principle: Sustainability

1. Focus on strategic capacity building
2. Pilot new modules
3. Ensure quality control

- The thrust of our discussions will be presented under the commonly agreed guiding principle of sustainability

- Strategic CB: beyond isolated training efforts, considerate of broader national/regional context and framework

Strategic Capacity Building

1. Share existing training materials for in-country capacity building (pre- and in-service trainings)
 - Focus on MOH, national/regional Training Institutions, NGOs
 - Ownership, locally adapted
 - Preparedness
 - Bridge the gap between immediate relief, recovery and development
2. Prioritize selected crisis-prone countries/regions
 - Training delivered by national/regional institutes and supported by IAWG

Importance of inter-agency/institution networks to share materials and best practices and to encourage south-south exchange

New Modules

- Identify gaps in trainings and set priorities
- Field test and/or adapt selected new modules and new SRH technologies for low-resource settings
- Pilot innovative training methods
 - E-learning
 - Link with UNITAR (UN Institute for Training And Research)
 - Exploring new ideas
 - Mobile phone learning...

- Map existing trainings, identify gaps and set priorities

Quality control

- High standard of trainers
- Quality standard of training materials
 - Informed by evidence, reproducible by other trainers, accessible to adult learners, translated and adapted
- Certification of trainees (link with country or internationally agreed standards)
- Monitoring and evaluation at different levels
 - Effectiveness: trainers, training course
 - Performance/competency of trainees
 - Mentoring/follow-up of trainees

Few next steps...

- IAWG website: www.iawg.net
 - *Training partnership webpage*
 - Link with other websites, e.g. ReliefWeb
- Matrix of available trainings
 - Links to existing trainings: what, for whom, when, where, certification,...
- Community of practice for trainers: refresher, best practice
- List of trainers to be shared among agencies
- Pilot clinical outreach training modules
