FORM B

This 4-page form is part of a global evaluation of what reproductive health services are available to refugees and internally displaced persons. Please help us by completing this information as carefully as possible. It should take only about 15 minutes to do this. We are looking very simply at what services are available. Please include all RH services that are available to this population, including those provided directly in this settlement **and** those for which clients are referred. Please note that we are asking about services available to this population, and are not currently concerned in whether or how much the services are used. Another part of the evaluation will be doing more in-depth studies of selected locations. *Thank you!*
